Description

Issue Description:

Getting a Database issue when I upload Big File in the upload option

See attached screenshot/screen Record:

The screenshot shows a web browser window with the URL `https://psc-dev.digitalnoticeboard.biz/register`. The error message displayed is: `Illuminate \ Database \ QueryException` with the message `SQLSTATE[22001]: String data, right truncated: 1406 Data too long for column 'name_of_business' at row 1`. Below the error message, there is a code snippet: `INSERT INTO `application_member` (`application_type_id`, `name_of_business`, `legal_status`, `date_of_egistration`, `sector`, `No_of_employees`,`. The code editor shows the file `app / Http / Controllers / Auth / RegisteredUserController.php:227` with the following code:

```
212     'supporting_document.*.mimes' => 'Each document must be a file of type: jpg, jpeg, gif,
213
214     ]);
215
216     // dd($request->supporting_document);
217
218     $your_expectation = implode(',', $request->your_expectation) ;
219     $contribute_towards = implode(',', $request->contribute_towards) ;
220     $references_name = implode(',', $request->references_name) ;
221     $references_address = implode(',', $request->references_address) ;
```

History

#1 - 10/10/2024 12:58 PM - Abhimanyu jha

- Status changed from New to Resolved

- Status changed from Resolved to Reopened

Not Fixed!

Stack Overflow page for `Illuminate \ Http \ Exceptions \ PostTooLargeException`. PHP 8.2.25, 10.48.20.

Code snippet from `C:\Application\PSC\public\index.php : 50`:

```

26 |
27 | Composer provides a convenient, automatically generated class loader for
28 | this application. We just need to utilize it! We'll simply require it
29 | into the script here so we don't need to manually load our classes.
30 |
31 | */
32 |
33 | require __DIR__ . '/../vendor/autoload.php';
34 |
35 | /*
36 | -----
37 | Run The Application

```
