Description

Issue Description:

If I put the long name in some input field then getting a database error message

See attached screenshot/screen Record:

The screenshot shows a web browser window displaying a database error message. The error message is: "SQLSTATE[22001]: String data, right truncated: 1406 Data too long for column 'registered_office_address' at row 1". Below the error message, there is a code editor showing the PHP code that caused the error. The code is located in "app / Http / Controllers / Auth / RegisteredUserController.php : 227". The code snippet is: "supporting_document.*.mimes" => 'Each document must be a file of type: jpg, jpeg, gif, '];". The error message is highlighted in red, and the code editor is also highlighted in red.
