Description

As a dentist, I should only see upcoming requests from users with dental-related symptoms. Currently, users with all symptoms are appearing under my upcoming requests, but it should only display requests relevant to my specialization.

The screenshot shows the AllyDoc web application interface. At the top, there's a navigation bar with the AllyDoc logo and a user profile for DEEPA. A sidebar on the left contains menu items: Home, Appointments, Messages, Treatment plan, Payments, Settings, and Notifications. The main content area is titled 'Good Morning Dr. DEEPA' and features a 'Visits for Today' summary card showing 1 visit (0 New Patients, 1 Old Patients) and a profile picture of a male doctor. Below this is an 'Upcoming Appointments' table with columns for S.No., Name, Date, Time, and Status. To the right, there's an 'Upcoming Request' section with a 'View All' link, displaying a list of requests from a user named 'Ishika' with 'Accept' buttons.
