

Milisto - Bug #11715

I am able to create multiple groups with the same name. It should show an error message if the group name already exists.

Description

The screenshot shows a web browser window with the URL `milisto.com/blog-category/3`. The page features a search bar and a category filter set to 'Comedy'. The search results are displayed in a list format. A chat sidebar is visible on the right side of the page, showing a list of chat participants including 'MishaFamily' and 'Test'. The browser's address bar shows a search for 'Microphone off' and an error message: 'We have encountered an error in Speech Recognition Service, please try again. Error Code: 1002'.

The error message should be 'Group Name already exists'.
