Orthocare Client Portal - Bug #11991

On the result step, when I click on the "Save Result" button, it does not display a confirmation message indicating whether the result was saved successfully.

Target version:			**Spent time:**	0.00 hour

Description

Additionally, I am able to go back to the previous steps and edit the fields even after clicking on "Save Result" from the left side stepper progress. check video attached.
Please display a proper success message after saving the result, such as "Result Saved Successfully." After that, the page should navigate to the Home page or another relevant page, allowing me to check for any other symptoms.

History
