Target version:		Spent time:	0.00 hour
Description			
Steps to Reproduce: Initially, I selected the Fever symptom, and the result displayed was: "No medicine needed. Take rest." Using the side progress bar, I navigated back to the Symptoms page and selected the Arm symptom. At the end, the result displayed was: "Check Fracture." I saved the result. However, the following issues occurred: The title displayed Neck symptom instead of the selected symptoms. Under the Questionnaire section, both Fever and Arm questions appeared, but the result shown was: "No medicine needed. Take rest."
