Description

Issue Description:

user is able to update her social networking site with invalid URL & invalid link

See attached screenshot:

The screenshot shows the 'Social Links' settings page in the Milisto application. A green notification banner at the top of the settings area reads 'Setting successfully updated!'. Below this, there are six input fields for social media usernames, each with a red box around it. The fields are labeled: Facebook (jjkxjsdjdjk), Twitter (djkkajkksdjk), Vkontakte (akajdkajk), LinkedIn (djjksdajkajs), Instagram (ajasdjkjkdasdj), and YouTube (adjkjaak). The page also features a navigation menu on the left and a chat window on the right.

- Status changed from New to Feedback

enter the username of the social media

I just update the placeholder like Facebook Username, Instagram Username, Youtube Username
