Description

Issue Description:

getting "something went wrong" success message when user tries to save two-factor authentication with email

See attached screenshot/screen Record:

The screenshot displays the Milisto user interface for Two-factor authentication settings. The user is 'Nazar Rax'. The 'Two-factor authentication method' is set to 'E-mail'. A red error message states: 'Something went wrong, please try again later.' The 'SAVE' button is visible below the dropdown menu. The left sidebar contains navigation options: General, Profile, Social Links, Notification Settings, Avatar & Cover, Privacy, Password, and Manage Sessions. The 'Two-factor authentication' option is highlighted in the sidebar. The bottom of the screenshot shows the Windows taskbar with the date and time as 01:30 PM on 15-01-2025.
