

PTCCB - Admin - Bug #12593

Once the inspector approves an application, they should no longer be able to access it from anywhere. However, currently, if the application number is manually edited in the URL, it is still accessible.

Description

The screenshot shows a web browser window with the URL `ptccb.ui.staging.digitalnoticeboard.biz/ProductRegistrationApplicationView/1111`. The page title is "Pesticides and Toxic Chemicals Control Board". The main content area is titled "Track Registration" and displays a list of registration records. The records are as follows:

Status	Date
Submitted	03 February, 2025
Approved Product [ToxiStop Pro]	03 February, 2025
Reviewed and Approved on Level-1	03 February, 2025
Approved Product [PestXpert Elite]	03 February, 2025

A user profile for "Ins1 Pec Tor" is visible in the top right corner, with a "Logout" button below it. The browser's address bar shows the URL `https://ptccb.ui.staging.digitalnoticeboard.biz/#`.

Check screenshot attached.

After approving Application 1110, I edited another application by replacing ID 1110 with 1111, and it still showed the record.
