Description

The screenshot shows a web browser window with the URL `wasco-billing-analytics-ui.netlify.app/reset-password`. The page displays the WASCO logo and a 'Reset Password' heading. Below the heading, a light blue box contains the text: 'A verification code has been sent to your registered email address. Please check your inbox and enter the code below, along with your new password, to reset your account.' There are three input fields: the first contains 'KibWkcz', the second and third are masked with dots. A blue 'Reset Password' button is at the bottom. A red error notification in the top right corner reads: 'Request failed with status code 500'. The browser's address bar shows a speech recognition error: 'We have encountered an error in Speech Recognition Service, please try again. Error Code: 1002'. The Windows taskbar at the bottom shows the date and time as 11:21 AM on 2/25/25.
