Description

Issue Description:

if the admin updates the toggle button then the status should be updated instantly instead of after the refresh

See attached screenshot/screen Record:

The screenshot shows a web application interface for managing categories. A notification banner at the top right indicates 'Status updated successfully.' with a green checkmark. A red box highlights this banner. Red arrows point from the banner to the 'Active' status of the first category, 'Salad Dressing', and to its toggle switch. The table lists categories: Salad Dressing, Toothpaste, Detergent, Pampers, Infant Formula, and Tuna. Each row has a status (Active) and an Actions column with a toggle switch, eye icon, link icon, and trash icon.
