### Description

Issue Description:

if the admin updates the toggle button then the status should be updated instantly instead of after the refresh

See attached screenshot/screen Record:

The screenshot shows a web application interface for managing brands. At the top, a green notification banner reads "Status updated successfully." Below this is a "Brands" table with columns for S.No., Brand Name, Status, and Actions. The table contains six rows of brand data. The second row, "New Brand" (S.No. 2), is highlighted in grey, and a red arrow points to its toggle switch, which is currently in the "off" position. Other rows have their toggle switches in the "on" position. The interface also includes a sidebar with navigation options like Dashboards, Users, Zone, Market, Categories, Brands, UOM, Commodities, Surveys, and Submitted Survey. At the top right, there are buttons for Filter, + Brands, Import, and Export, along with search and reset options.
