Description

Issue Description:

Admin --> Login --> Dashboard --> Surveys --> Filters --> Getting a database error when admin search with survey number.

https://consumeraffairs.digitalnoticeboard.biz/admin/submitted/survey/filter?survey_number=asjkjasdjksdjksf&name=&zone=&status=&publish=&start_date=&end_date=

See attached screenshot/screen Record:

The screenshot displays a web browser window with a debugger open. The error message is: `Illuminate \ Database \ QueryException` with the message `SQLSTATE[HY093]: Invalid parameter number`. The SQL query being executed is: `SELECT count(*) AS aggregate FROM `submitted_surveys` WHERE `survey_id` = 4 AND `id` IN (12, 14, 18, ?)`. The stack trace shows the error occurred in `app / Http / Controllers / admin / SubmittedSurveyController.php` at line 139. The debugger interface includes a 'STACK' view, a 'CONTEXT' view, and a 'DEBUG' view. The 'CONTEXT' view shows the current file and line numbers. The 'DEBUG' view shows the code around the error, including an `if` statement for `$request->start_date` and another `if` statement for `$request->end_date`.
