Target version:		Spent time:	0.00 hour
Description			
clipboard-202503071539-vekrk.png In the payment list, when making a payment to the client, the displayed amount is incorrect in cases where a coupon is used. A client books a family appointment where the per-appointment cost is €70. The client applies a €10 coupon and pays €60 instead of €70. The system calculates the counselor's commission incorrectly. The admission commission is set to €30, but the counselor should receive €40 (€70 - €30 = €40), considering the coupon discount.			

History

#1 - 03/07/2025 03:47 PM - priyanka Sharma

- Subject changed from Payment list - when going to pay to client - Amount displaying wrong. Client has used 10euro coupon for family appointment so he pay 60 euro but counsellor commision set is 30euro in admin so counsellor will get 40euro instead of 30euro to Incorrect Counselor Payment Calculation in Coupon Case

- Description updated
