Description

Issue Description:

in update functionality is not working properly, when the admin updates any banner then New banner adding instead of an updating

See attached screenshot/screen Record:

The screenshot shows a web application interface for managing banners. A modal window titled "Edit Banner" is open, prompting the user to enter data. The modal contains a dropdown menu set to "Active" and a text input field containing the file name "1740141164_820825765.jpg". Below these fields is a green button labeled "Update Banner", which is highlighted with a red rectangular box. A red arrow points from this button to a green notification banner at the top right of the page that reads "banner added successfully." The background shows a sidebar with navigation options like "Dashboard", "Survey Management", "Report", "User Management", "Role", "Enquiry List", "Complaint", "CMS", and "Banner".
