### Description

Issue Description:

Admin--> CMS --> Our Mission --> getting a database error when admin clicks on the update button

See attached screenshot/screen Record:

The screenshot shows a web browser window with the URL `affairs.digitalnoticeboard.biz/admin/cms/our-mission-update`. The browser's developer tools are open, displaying a PHP error message: "Undefined variable \$image". The error is located in the file `app/Http/Controllers/admin/CMSController.php` at line 164. The source code snippet shows the following lines:

```
149 $path = 'admin/images/cms/';
150
151 if ($request->id && $aboutData->image) {
152     $oldImagePath = public_path($path . $aboutData->image);
153     if (file_exists($oldImagePath)) {
154         unlink($oldImagePath);
155     }
156 }
157 $image = $this->imageUpload($request->file('images'), $path);
158 }
159 $id = ['id' => $request->id];
```

### History
