Description

Client requirement:-
"Specific for Domestic Insurers -
Quarterly aggregated data on income statement and balance
sheet returns as well as aggregation of the annual returns.
If possible, it would be helpful if the system could generate
a complete aggregation of all of the annual forms B, C, and D
and the quarterly form Q which are all completed by domestic
insurers."

STEP TO REPRODUCE THE ISSUE:-
License panel
insurance
upload return for quarterly/annually
put value
validate & submit
approve & validate from the admin end
report
consolidated report
insurance
select year

ACTUAL RESULT:-
then provided value by the user does not reflect at admin in the report section.

EXPECTED RESULT:-
The given value should reflect in the report section according to client requirements after validation & approve from the admin end.
