

Curewell Doctor-Android - Bug #2765

Appointment details > Prescription tab . check issues below

06/21/2022 12:29 PM - priyanka Sharma

Status:	Closed	Start date:	06/21/2022
Priority:	Normal	Due date:	
Assignee:	shefali srivastav	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Spent time:	0.00 hour
Description			
<p>1. After adding prescription by doctor change text of successfull message "prescription is added suuccessfully". It should be "Prescription added successfully"</p> <p>2. Once prescription added & trying to add new prescription for same appointment then field should reset...seems prefilled</p> <p>3. Edit prescription > edit any field> it shows editor & after updating anythin there if i submit it , it navigates me on again Add prescription field. It's not working fine.</p> <p>4. Not option to edit Medicine field</p> <p>5. Add/Edit prescription - show field labels ..change the design of input fields</p>
