### Description

AFSC-->Role permission-->Arti #Testing -->give permission for "Administrator »"(Tick all check box for Administrator »)-->update information-->Login with user "[rt@yopmail.com](mailto:rt@yopmail.com)"-->Even after permission given that "Administrator" tab is not getting active at that user end.

Concern from Arti's end: I am not clear about this concept but technically field after permission should reflect at that user end.
