

ADMINISTRATION Module - Bug #3643

AFSC-->Manage User-->Edit-->Role-->select more than one role to single employee (Let suppose 2 role)-->Update-->system throws confirmation message "update successfully", but system doesn't accept both the role(Means only single role appears for that time)

Description			
AFSC-->Manage User-->Edit-->Role-->select more than one role to single employee (Let suppose 2 role)-->Update-->system throws confirmation message "update successfully", but system doesn't accept both the role(Means only single role appears for that time).			
Query: How it will work? means can single employee adopt more than one role?
