

GLISTEN - Modification/ Enhancements #5130

Client feedback --> The biggest problem is that the size of the photo and content is not matching in whatever post properties are visible. The photo is moving out of the content, somewhere the content is moving downwards.

Description			
Step to reproduce the bug:			
The biggest problem is that the size of the photo and content is not matching in whatever post properties are visible. The photo is moving out of the content, somewhere the content is moving downwards. A lot of space also appears empty under the photo, you can see on other websites like magicbricks. The photo and the content should remain the same size.			
see attached screenshot:
