<b>Description</b>			
Step to reproduce the bug:			
1. Dashboard			
2. Search			
3. Filter property			
This point was also informed earlier that the size of the photo and content is not matching in whatever post properties are visible. If the photo is going out of the content, then somewhere the content is going down from the photo. There is also a lot of empty space below the photo, you can see on other websites like magicbricks. The size of the photo and the content should be the same. Whose screenshot has also been sent to you earlier.			
See attached screenshot:
