- Status changed from New to Resolved

i already said u in previous bugs, this search is working according to restaurant name, tag, type_cuisines etc. in zomato it is searching on the basis of restaurant name. there food name is always included with their restaurant name.

#2 - 10/07/2021 05:26 PM - Minal Watmode

- Status changed from Resolved to Reopened

It should search by dish as well
User would not be able to see product which is already in application.
